

PAPER_1754_F_TRZ_SQUARED_1_100_UNIVERSAL

Daniel T. Murphy

PAPER_1754 — $F_TRZ^2 = 1/100$ Universal Constant = $F_TRZ^2 = 1/100$ — same primitive form as MAD eta_EM (PAPER_1518)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Foundational

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_1199 Information+Math unified proof set)

Observation

PAPER_1199_S446 (PAPER_1199 Information & Math Constants Unified Proof Set) gives:

``

$F_TRZ^2 = 1/100$ — same primitive form as MAD eta_EM (PAPER_1518)

``

Status: **EXACT**.

UQFF Closed Identity

``

$F_TRZ^2 = 1/100$ — same primitive form as MAD eta_EM (PAPER_1518) EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks compute this constant via different methods. UQFF supplies a structural integer-primitive form.
