DPM Coherent Consciousness and Spooky Action at a Distance

CP4 Class: #460 DPMCoherentConsciousnessSpookyActionCalc
Session 200C v5.61 | Source: describe mass without using weight.txt

Abstract

The DPM (UA'+SCm) is coherent and produces shared consciousness both locally and at spooky distances. THz hole synchronization produces paired resonance that drives systems to collide and/or repel from galactic distances. Directly responsible for galactic red/blue shifting both locally and at spooky distance.

Key Equations

```
coherence = fSCm_A * fSCm_B
E_pair = rho_SCm * c^2 * nu_THz * coherence
Delta_nu = k_shift * nu_THz * (fSCm_A + fSCm_B)    (red/blue shift)
z = Delta_nu / nu_emit
C_consciousness = coherence * (1 - e^{-nu_THz/10^12})
E_surplus = E_pair / d^2    (signal bundle at distance)
```
